The sizes listed above are NOT THE ONLY SIZES WE MANUFACTURE! We can make any size tag. If you are looking for an "odd size tag" i.e., 1/2" x 1-1/4", no problem, the cost would be the same as a 1" x 2" tag (\$1.10). There are no hidden set-up fees for odd size tags. The cost for them will be the next size up.

For calculating sign cost, use this formula:

We charge .35 per square inch for material and engraving the text. Braille is extra. Example: A customer would like a sign that is 8" tall x 10" wide, how cost is calculated: $8 \times 10 = 80 \times .35 = \28.00 will be the cost of the sign.

Do you need 2-sided tape applied or pre-drilled holes? Tape prices are: .05 per label per piece. Meaning if you need 2-sided tape on a 1" x 3" label the cost would be \$1.35 each. If you need tape on a 2" x 4" label that would require 2 pieces (one on each end) & that would be .10 per label, total cost \$2.90 each.

Pre-drilled holes are .05 per tag, label or sign. We put one hole centered on both the right and left side, unless otherwise requested.
